HOUSEHOLD HAZARDOUS WASTE

Certain household chemicals, when not used up properly, become household hazardous waste. These products may contain the same chemicals as strictly regulated industrial wastes and pose the same threat to human health and the environment.

- Solvents
- Lead & oil paints
- Aerosol cans
- Propane tanks
- Batteries
- Pesticides
- Herbicides
- Used oil
- Antifreeze
- **...and more**

Never dump these pollutants down a drain or outside, and always check local regulations to learn how to dispose of them properly.
